

WSS1003

Product technical specification

WSS-1003 is used as a water-based feel agent and anti-graffiti additive.

- Smooth feel
- Anti-graffiti effect
- Anti-blocking
- Water dispersibility

Recommended Applications

Recommended dosage of water-based acrylic resin/ water-based polyurethane resin

Based on the total formula in the form of supply: 1.0-3.0%

Technical data

Appearance: milky white liquid

Active matter content: $\geq 55\%$

Process Description

Pre-diluted or directly added to the paint in the form of supply

chemical composition

Organosiloxane copolymer emulsion

package

2.5 KG, plastic bucket

Storage stability

Store in unopened original packaging and use within 12 months from the date of production .
